

Your Peace of Mind is a Priority at the Center for Breast Care.

Comprehensive Care

Screening, diagnostic care and treatment are available at the main campus. Some services are not available at satellite locations.

- Full digital mammography environment for screening and diagnostic care and treatment. Only 10 percent of the diagnostic centers in the nation can make this statement
- Digital breast ultrasound
- Three-dimensional breast ultrasound
- Breast MRI
- Breast PET scanning
- Bone mineral densitometry
- High risk screening
- Mobile mammography
- Needle localization
- Every mammogram is read by computer aided detection technology
- Breast biopsy by mammogram, ultrasound and MRI
- Physical breast exam by a nurse practitioner/physician assistant
- Stereotactic breast biopsy
- Sentinel node mapping
- Galactography
- Breast cancer risk assessment genetic counseling/testing
- Patient care coordinator
- Clinical research studies
- Second opinion service
- Funding for underserved women

It Takes a Team To Deliver the Care You Deserve

Trained at some of the most prestigious universities in the nation, our multidisciplinary team includes board certified physicians, technologists and healthcare professions. Their combined depth of experience is unparalleled. Our patients benefit from the combined expertise of surgeons, oncologists, radiologists, pathologists, nurses, therapists, social workers and other professionals who review and discuss patient cases at weekly oncology conferences.

Center for Breast Care at the WOMEN'S CENTER

Your Peace of Mind is a Priority at the Center for Breast Care

Welcome to our Family of Breast Care Specialists

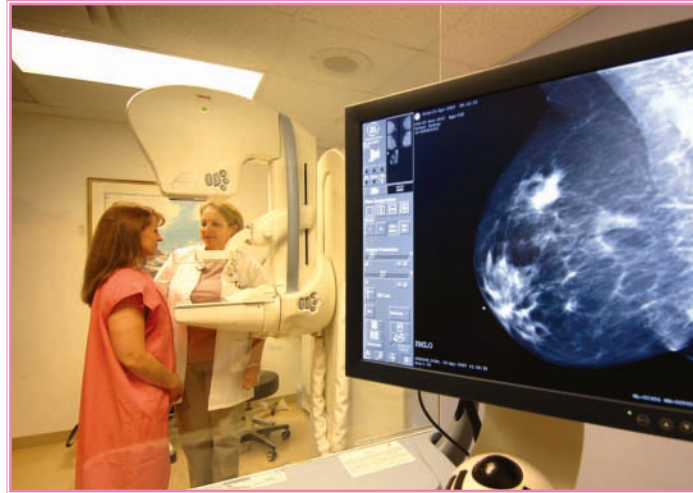

Who Believe . . . Waiting for results is always an anxious time. That is why we've implemented same day service to receive primary information regarding the first stages of screening. Regardless of the degree of additional care that may follow, we trust that your first experience with us will assure you that prompt, comprehensive and caring treatment will be the standard at the Center for Breast Care at the Women's Center.

The normal flow of care could take you through each of these Care Centers . . .

- Screening
- Case-by-Case Consultation
- Preventative Consultation & Lifestyle Counseling
- Diagnostics
- Risk Assessment

Our patients are worth the time it takes to obtain peace of mind. That is why we create a personalized plan of action designed especially for you. We provide a choice for your care. When you spend time with us, you can receive results at the conclusion of your visit. If it is more convenient, we can perform the mammogram and you can receive your results the following day or later in the week. We make this option available to all of our patients.

Who's Reading Your Mammogram?

Fellowship-trained, dedicated breast care specialists who can provide answers and results you can trust.

At the Center for Breast Care, we have created a new experience for our patients in an atmosphere of care designed to provide answers and results you can trust. Our physicians have dedicated their practices to the treatment of breast disease. You can depend on us to combine experience and cutting-edge technology to create a comprehensive treatment plan designed especially for you.

Not just a report, but a multidisciplinary approach to care. The result is a philosophy of care that we utilize in our daily evaluations and your recommended course of treatment.

You are our only priority.

The Center for Breast Care

- Collaborates with globally significant scientific medical research & development teams
- Mini fellowship opportunities for physicians and other medical personnel to train locally at the Center utilizing state-of-the-art technology, an opportunity taken by representatives from John Hopkins, the Mayo Clinic and the University of North Carolina School of Medicine with results published in national publications.

Meet Our Medical Directors

Our Effectiveness and Strength
Rests in These Two Partnerships...

Medical Director Louise Morrell, M.D., is a medical oncologist. Dr. Morrell has dedicated

**MEDICAL DIRECTOR
LOUISE MORRELL, M.D.**

her career to treating high-risk breast cancer patients and women's health. She directs the risk assessment clinic that provides genetic counseling, testing and prevention strategies to women with increased risk of breast and ovarian cancer.

Medical Director Kathy Schilling, M.D., is

**MEDICAL DIRECTOR
KATHY SCHILLING, M.D.**

a nationally recognized radiologist and a pioneer in advanced biopsy techniques and the development of the multidisciplinary approach in a multi-modality center where multiple evaluations are available at one location.
